*A is for Activist* is a short story that goes into detail about some of the inequalities of the world, and it uses each letter of the alphabet to teach the readers ways they can help fix those inequalities. The author uses words and illustrations to demonstrate to the readers some of the major problems in America. The book teaches younger children about poverty, war, racism, and a lot of other important topics that everyone should be educated on.

I personally enjoyed this book because it's a great way to spread awareness, especially to kids of younger ages! The illustrations and pages perfectly depict how to make the world a better place. I believe that it is important, no matter what age, for people to be educated on the topics of injustice. The more that children are educated on it, the sooner they'll be able to take a stand against it.

I believe this book would be most appropriate for people ages 9 and older. It would be great to be given as a gift to someone, because I feel like it is an important book for someone to keep and cherish! As important as this book is for younger kids, it's also just as important to anyone older, so I think everyone would benefit from having read this book!
